

# KEEP ENNIS *Beautiful*

## Project Reuse

### Keep usable materials out of the landfill!

Keep Ennis Beautiful accepts donations of construction materials from individuals, builders, supply companies, remodelers, and contractors. These materials are then made available at no charge to homeowners within the Ennis school district boundaries for needed home repairs.

Project Reuse benefits the community by providing storage space for excess building materials that would otherwise be dumped in local landfills. By storing these types of materials until they can be used, Project Reuse keeps these valuable resources out of our local landfills and puts them back into use in our community.

Keep Ennis Beautiful only accepts building materials that are in suitable condition for reuse and reserves the right to decline any materials offered for donation.

Contact Keep Ennis Beautiful to make arrangements to donate materials.
